INTRODUCTION

Welcome to The Hina Inu experiment.

This Whitepaper is a version-1, "living document" that will continue to be updated as time progresses. The Hina Inu experiment evolved from the concept of creating a "Superpack Ecosystem" consisting of a large number of cute crypto pups in order to bolster the growth of one another by getting their tokens utilized in a variety of ways including through payment at e-commerce websites, developing swapping platforms, gamification concepts (virtual pets, and similar), community engaged NFT Platform (the first or few of its kind), and much much more!

Consisting of a team of well-educated professionals working hard on the Hina Inu concept, much has been achieved since its inception. The utilization abilities for Hina Inu are endless and exciting at the same time! As you continue reading through this document, you will find where our concept is gravitating towards (gamification and much more), with intriguing utility ideas discussed and planned. Trust is one of the core-most elements of any ecosystem and this has been a mutual pleasure that the Hina Inu team and the hodlers enjoy, thus sharing a professional, warm and strategic relationship that will continue propelling this experiment to its truest potential.

We are decentralization, decentralization is us.

DISCLAIMER

The information shared in this whitepaper is not all encompassing or comprehensive and does not in any way intend to create or put into implicit effect any elements of a contractual relationship. The primary purpose of this whitepaper is to provide potential token holders with pertinent information in order for them to thoroughly analyze the project and make an informed decision.

Prior to your participation in the purchase of Hina Inu tokens, we strongly advocate a careful study of this whitepaper. Certain statements, estimates and financial information featured in this whitepaper are forward-looking statements that are based on and take into consideration certain known and unknown contingencies and risks which in eventuality may cause the estimated results or may differ factually and substantially from the featured estimates or results extrapolated or expressed in such forward-looking statements herewith.

ECOSYSTEM - 1

The "Superpack Ecosystem" has already partnered with 6 animal-based tokens, namely - Kuma Inu, Fat Doge, Labra Coin, Corgibutt, Moonpug, Snoop Doge where active collaborations with each token in the ecosystem has led to successful movements towards their respective visions, thus bolstering hodlers' trust and commitment towards this concept. We are actively forging new, strategic partnerships with other animal-based tokens and more partnership announcements will be made in due time.

This Superpack Ecosystem will:

- ☛ Act as a DAO of sorts (the architecture is being designed as this statement is being composed)
- ☛ Include elements of cross-chain swapping
- ☛ Enable group swapping
- ☛ Joint-NFTmarketplaces
- ☛ Venture-capital style of token development where the ecosystem will guide the direction of new animal-based projects
- ☛ Providing a platform for token projects to easily communicate with one another as a part of the same ecosystem
- ☛ Live Price tracker for each of the tokens partnered with Animalia
- ☛ Gamification concepts (Daily Rewards Virtual Pets)
- ☛ An online "School" to educate the general public of the concepts of cryptocurrency, tokenomics, investment strategies and similar elements
- ☛ Wallet application to manage your Animal token portfolio

The Hina Inu Experiment evolved as a sub-concept of the "Superpack Ecosystem". This ecosystem is currently under active development and more details will be revealed once we reach the final stages of the "Superpack Ecosystem" project. We are excited to be working simultaneously on this ecosystem, which is ultimately aimed at providing a wider range of exposure, acceptability and knowledgeability to the general public.

ECOSYSTEM - 2

Utilization concepts that will be deep-dived into:

01

HinaSwap

HinaSwap will be a decentralised exchange (DEX) where users can swap ERC20 tokens for \$HINA tokens and vice versa. This will allow existing hodlers and new investors to have easy access to \$HINA tokens. In the later phases of the project, we will look into implementing staking initiatives and upgrade HinaSwap to allow holders to stake \$HINA for greater rewards.

We envision this to be a community-engaged marketplace. We will engage artists or aspiring artists in the community who are willing to contribute to create NFTs and put them up for sale in our NFT Marketplace. Funds generated from the sales of these NFTs will be used to further grow the project and could also potentially be used for "Buyback & Burn" to further reduce the circulating supply of \$HINA.

02

Hina NFT
Marketplace

03

Hina Wallet
App

Hina Wallet will come in the form of a mobile application, which will allow hodlers to track their \$HINA holdings, portfolio performance and be able to directly buy and sell \$HINA on the application itself. We will also work on payment gateway integrations with e-commerce websites such as Shopping.io and Cryptocart.cc.

As our project grows, we will create Hina merchandise such as t-shirts, hoodies and caps so everyone in the community can wear them and be \$HINA ambassadors. This will allow us to raise awareness for the project as a community and attract new investors. The sales proceeds will be used to fund the growth of the project and also donated to animal related charities.

04 Hina Merch

05 Hina Virtual Games

We will also look into incorporating gamification concepts in our future pipeline, by creating highly engaging games such as raising virtual pets, with the ability to earn Hina Tokens on a constant basis. Players would need to be a holder of \$HINA to be able to use \$HINA tokens to participate in these games and potentially win greater rewards.

FEATURES

Instant Rewards + Auto Burn

With every buy/sell transaction, 2% of the transaction value will be distributed to all hodlers and burn address automatically and in real-time. Hodlers will be rewarded as they hold and circulating supply will decrease over time, increasing the value of the token.

Community Token

Hina Inu is a 100% community-driven project and there is no team/dev/marketing wallet. The team is made up of hodlers from the community in entirety, who will always put the community's best interest at heart.

Trust & Transparency

We strive to build a high trust level and maintain complete transparency with all our hodlers and keep them updated with the latest information. The most expensive asset in this world is "Trust", without which no company, organization or project can function effectively.

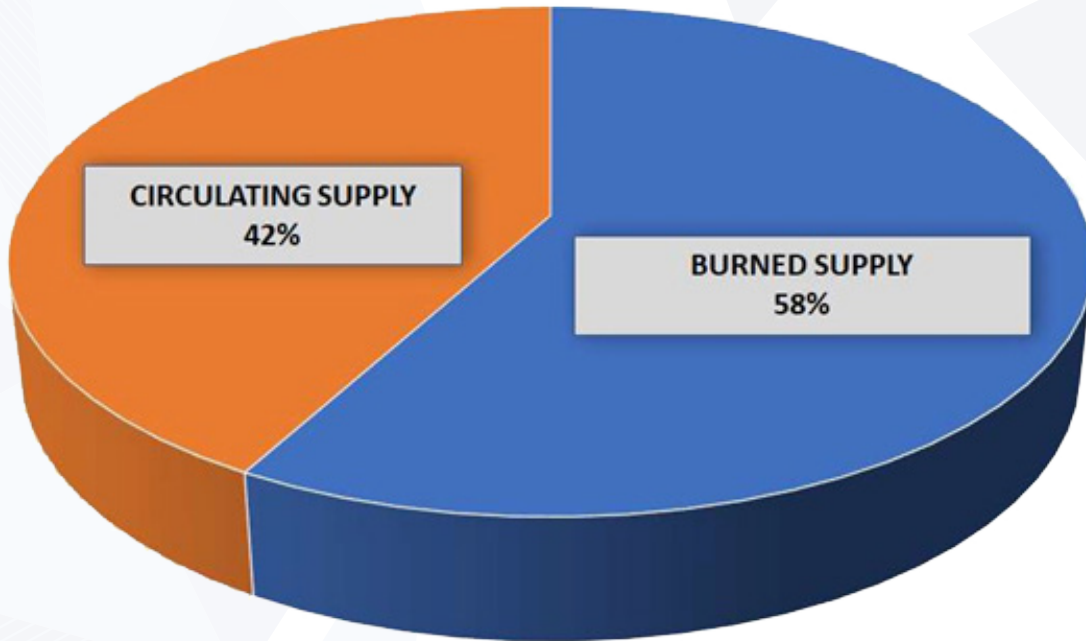

100% Safe & Rug-Proof

We have renounced ownership of the contract and burned LP tokens. That means no one owns the contract and the liquidity pool is locked forever. We have one of the healthiest token distributions currently available, with no whales controlling significant amounts of the total supply. Most of the hodlers own less than 1% of the total supply. There is no way anyone can rug pull the token.

\$HINA TOKENOMICS

\$HINA SUPPLY DISTRIBUTION

Token Symbol: \$HINA

Total Supply: 100 Quadrillion

Burned Supply: 58% (increases over time)

Circulating Supply: 42% (decreases over time)

2% of each buy/sell transaction is redistributed to existing hodlers and burn address.

\$HINA is a low tax, fully decentralized, deflationary digital currency, owned in whole by its community, with instant rewards for hodlers and an auto-burn mechanism in place.

MOONMAP

PHASE 1 LAUNCH

- Website Launch
- CoinGecko Listing
- CoinMarketCap Listing
- 3,000 Holders
- 3,000 Telegram Members

PHASE 2 GROWTH

- New Website
- Whitepaper Release
- Hina NFT Marketplace
- 5,000 Holders
- 5,000 Telegram Members

PHASE 3 EXPANSION

- HinaSwap (Decentralized Exchange)
- Launch of Superpack Ecosystem
- Marketing Campaigns
- Initial Centralised Exchange Listings
- 15,000 Holders
- 15,000 Telegram Members

PHASE 4 TO THE MOON

- Hina Merch
- Hina Charities
- Hina Wallet App (with credit card purchasing)
- E-commerce Websites Integration
- Hina Virtual Games
- 30,000 Holders
- 30,000 Telegram Members

FUNDING

As a 100% community-powered project, we do not have a team/dev/marketing wallet. \$HINA runs thanks to its amazing volunteers, community and generous donors.

If you would like to help us grow this project, use the official ERC20 donation wallet here:

0xa546228940B1567515C71ba87eD1EA9a0746C652

Accepted : Any ERC20 token Preferred: \$ETH, \$USDC, \$HINA

These donations will ONLY be used to grow the community (marketing, listings, giveaways, etc) and to enhance the utilities of \$HINA such as implementation of NFT marketplace, HinaSwap, etc.

Any amount of ERC20 tokens would be helpful and help \$HINA go a long way!

For transparency, you can always track the movement in the donation wallet here <https://etherscan.io/address/0xa546228940B1567515C71ba87eD1EA9a0746C652>
